TONY AJ

Software Engineer

Building smart apps with clean code and powerful APIs.

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in **backend development, mobile applications, and AI-powered systems**. Skilled in building **RESTful APIs, scalable backend architectures, Flutter applications, and automation workflows**.

Worked on real-world systems including **inventory management, e-commerce platforms, AI chatbots, and RAG-based applications**, with additional experience contributing as a **core team member at Skill Hive Innovations**, building platforms for freelancer task distribution.

Strong interest in developing **end-to-end applications**, from backend systems to user-facing interfaces.

TECHNICAL SKILLS

Programming Languages

Java, JavaScript, Python, Dart

Backend & APIs

Node.js, Express.js, RESTful API Development, API Integration

Mobile Development

Flutter, FlutterFlow, Responsive UI Design

Frontend

HTML, CSS, JavaScript

Databases

PostgreSQL, MySQL, MongoDB (Basic)

AI & Automation

RAG, LangChain, AI Agents, NLP Basics, n8n, Streamlit

DevOps & Tools

Docker, Git, GitHub, Linux (Basic)

Core Concepts

Data Structures & Algorithms, OOP, Backend Architecture, SDLC

PROJECTS

Inventory Management System (Backend + App)

- Developed backend services using **Node.js and Express.js** for managing products and stock.
- Built **REST APIs** for inventory updates and availability tracking.
- Integrated **PostgreSQL/MySQL** with CRUD operations and validation logic.
- Developed a **Flutter-based mobile application** for real-time inventory management.

E-Commerce System

- Developed backend logic for **products, users, and order processing**.
- Implemented **JWT-based authentication** and secure API workflows.
- Integrated relational databases for transaction and user management.

Cloud Crew – Freelancer Platform

- Built backend APIs for **skill-based project assignment and user management**.
- Designed workflow logic for project allocation based on user skills.
- Integrated frontend and backend for complete system functionality.

RAG-based AI Application

- Built a **Retrieval-Augmented Generation (RAG)** pipeline using LangChain.
- Implemented document-based query answering and context retrieval.
- Designed prompt workflows to improve response accuracy.

Mental Health AI Chatbot

- Developed chatbot using **Python and NLP concepts**.
- Implemented conversational logic and response handling.

AI Quality Control Automation

- Automated backend workflows using **logic-based automation**.
- Improved efficiency by reducing manual processing.

EXPERIENCE

Core Team Member / Backend Developer – Skill Hive Innovations

(Year – Present)

- Contributed to building a **freelancer platform (Cloud Crew)** that assigns projects based on user skills and experience.
- Developed backend APIs for **user management, task allocation, and workflow handling**.
- Worked on **system design and backend logic** for scalable project distribution.
- Collaborated with the team to design features supporting **freshers entering the IT industry**.

AI & Software Intern – CODTECH IT Solutions

Mar 2025 – May 2025

- Worked on **AI automation and backend workflows** using Python.
- Improved system performance through optimized backend logic.

Web Developer Intern – LITZ Tech

Aug 2024 – Oct 2024

- Developed web applications using **HTML, CSS, JavaScript**.
- Supported backend integration and data handling.

EDUCATION

B.E. Computer Science and Engineering
SNS College of Technology, Coimbatore
2023 – 2027

CERTIFICATIONS

- Artificial Intelligence: Concepts & Techniques – NPTEL
- Natural Language Processing – NPTEL
- Software Project Management – NPTEL
- Data Structures & Algorithms (Python) – ByteXL
- Databricks Fundamentals Accreditation – Databricks
- Enterprise Design Thinking Practitioner – IBM

ACHIEVEMENTS

2nd Prize – Code Debugging Competition
Special Mention – Paper Presentation

LANGUAGES

English, Tamil
