TONY AJ

AI & BACKEND DEVELOPER

tonyaj5759@gmail.com | +91 6383426229 | github.com/Tony-AJ | linkedin.com/in/tony-aj

PROFESSIONAL SUMMARY

Computer Science Engineering student and AI & Backend Developer with hands-on experience building backend APIs, AI agents, RAG systems, automation workflows, and production-oriented business applications. Experienced with Node.js, NestJS, PostgreSQL, Prisma, Python, Flutter, Docker, LangChain, and REST APIs. Built end-to-end HRM and hospital management systems, multilingual AI agents, and cybersecurity AI solutions. FinSpark'26 2nd Runner-Up and Best Idea Award winner.

TECHNICAL SKILLS

- Programming: Java, Python, JavaScript, TypeScript, Dart
- Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, JWT
- Databases: PostgreSQL, Prisma ORM, MySQL, MongoDB
- AI/ML: RAG, LangChain, LLMs, AI Agents, NLP, Hybrid Retrieval, n8n, Streamlit
- Mobile/Frontend: Flutter, FlutterFlow, HTML, CSS
- Tools: Docker, Git, GitHub, Linux

EXPERIENCE

Core Team Member / Backend Developer – Skill Hive Innovations | *Current*

- Develop backend APIs, workflow systems, and scalable application features for startup products.
- Built and contributed to end-to-end HRM and hospital management systems, including backend modules and API integrations.
- Worked on AI agents, RAG pipelines, multilingual support, AI voice-over workflows, and automation solutions.

AI & Software Intern – CODTECH IT Solutions | *Mar 2025 – May 2025*

- Worked on AI automation and backend workflows, including speech recognition, text generation, summarization, and neural-style applications.

Web Developer Intern – LITZ Tech | *Aug 2024 – Oct 2024*

- Developed web applications and backend integrations while collaborating with a team to deliver a complete website.

PROJECTS

Sentinel Fusion AI – Banking Cybersecurity Platform

- Built an AI-powered cybersecurity intelligence platform to correlate banking/cybersecurity signals, identify fraud and threat patterns, and provide explainable risk insights.
- Team won 2nd Runner-Up (3rd Prize) and Best Idea Award at FinSpark'26, a national-level Bank of Maharashtra cybersecurity innovation hackathon; shortlisted among the Top 20 finalists.

Hybrid LLM + RAG + RLU System

- Developed a hybrid AI architecture combining LLM-based reasoning with retrieval and feedback/reinforcement-oriented workflows for improved contextual responses.

End-to-End HRM System

- Built core HRM workflows covering employee management, attendance, schedules, leave, approvals, and related business operations with backend APIs and database integration.

Hospital Management System

- Worked on backend development for hospital workflows and built AI voice-over and multilingual AI-agent capabilities for multi-language interaction.

Research Paper Analysis using RAG

- Built a capstone RAG application for analyzing and querying research papers using document retrieval and LLM-based responses.

Inventory Management System

- Developed backend services using Node.js and Express.js with inventory APIs and a Flutter application.

E-Commerce System

- Built secure backend functionality using JWT authentication and relational database integration.

HACKATHONS & ACHIEVEMENTS

- FinSpark'26: 2nd Runner-Up (3rd Prize) and Best Idea Award; Top 20 finalist.
- Odoo Hackathon 2026: Advanced to the Grand Finale at Odoo India HQ, Gandhinagar; selected among 843 finalist teams from 20,000+ registrations.

- 2nd Prize – Code Debugging Competition.
- Special Mention – Paper Presentation on AI in HR.

EDUCATION

B.E. Computer Science and Engineering – SNS College of Technology, Coimbatore | *2023 – 2027*

- Currently pursuing final year.

CERTIFICATIONS

- Artificial Intelligence: Concepts & Techniques – NPTEL
- Natural Language Processing – NPTEL
- Software Project Management – NPTEL
- Data Structures & Algorithms (Python) – ByteXL
- Databricks Fundamentals Accreditation
- Enterprise Design Thinking Practitioner – IBM
